## MDR Transition

To Whom It May Concern,

REV-MED Inc. is currently working on a transition plan to move from the Medical Device Directive (93/42/EEC) to the Medical Device Regulation (EU 2017/745).

REV-MED Inc. currently possesses a CE certification (G1 095551 0002) that expires 21-November-2023.

REV-MED Inc. plans to transition prior to the expiration date on this certificate to ensure there is no delay in delivery of approved device types into the EU.

Once REV-MED Inc. acquires an MDR CE certificate, this will be provided to you as evidence of REV-MED Inc. being compliant to the requirements of MDR (EU 2017/745).

Even though the current MDD CE certificate will be valid by 21-November-2023, the essential requirements of MDR will be applied to the approved devices manufactured from 25-May-2020.

Yours Sincerely,

04 Nov. 2019

---
